

Academic Partner 2024

This is a big deal: Lesley University's [Game Design & Immersive Technologies](#) has qualified as an *Unreal Academic Partner*. [Unreal](#) is a game development tool from Epic Games. Lesley's animation, VFX, Film, and Game program courses are completely wrapped around Unreal Engine as the layout, lighting, and rendering solution, making Lesley the *only AICAD* school in New England to qualify as an *Unreal Academic Partner*.

Lesley Professor of Design **Curvin Huber** says Huber says "This partnership is beneficial to our students and programs because it will provide additional resources such as advanced information on internships and hiring events, free access to virtual reality software solutions, and promotion of the program and student projects on an international level."
